Technical Expertise

Medical Construction - Veliz Construction is a member of the American Society of Healthcare Engineering (ASHE). Veliz performs design-build for new medical equipment installation, interior hospital remodeling as well as entire floor and department renovations. The company’s primary medical customers are: GE Healthcare, Philips Healthcare, William Beaumont Army Medical Center, and the Hospital Corporation of America (HCA).

Design-Build - Veliz Construction works closely with customers in the planning, design, cost control, schedule, and site investigation. Collaboration of designers and builders is the foundation of design-build. The benefits of design-build projects include: single point of responsibility, early knowledge of cost, and time management.

Self-Perform - Veliz Construction delivers greater value to customers through the dedication and ability to self-perform specific critical trades. By performing fundamental scope of work such as foundations, drywall and carpentry, Veliz Construction is able to offer additional control and sets the pace of the projects.

Engineering Inspections - Veliz Construction provides Property Condition Assessments, Construction Monitoring, Energy Evaluation, Reserve Studies and Consulting (accessibility, roofing, HVAC, etc.) for Healthcare, Commercial, Institutional, and Residential customers.
